Real | RAGE GRAPHICS ENHANCER L | ite

WHAT IS THIS?

This is the lightweight version of my graphics mod called **Real | RAGE Graphics Enhancer**.

Lite, because it's only containing its ReShade preset!

It is a good choice if you like the game's original graphical mechanics and wanna spice it up with some ReShade enhancements; or you don't like other heavyweight graphics mod's ReShade preset and want to mix its game mods with my ReShade enhancements.

If you need a heavyweight graphics mod instead, you can download the full version of **Real | RAGE Graphics Enhancer** from [HERE!](#)

THE FILES

ReShade.ini: This is the settings file of the ReShade.

Real RAGE Graphics Enhancer.ini: This is the ReShade preset. This file tells to ReShade which shaders need to enable, and how to configure them. This makes visuals great! 😊

REQUIREMENTS

ReShade 3.4.1:

- 64bit Windows
- In the graphics settings set the DirectX version to DirectX 11

HOW TO INSTALL

1. Download the **ReShade 3.4.1 installer** (download button at the bottom of the site): [HTTPS://RESHADE.ME](https://reshade.me)

8. Open the **ReShade.ini** file from the mod's ReShade folder and from the game's root directory with a text editor (Notepad, Notepad++, etc.)
9. You need to correct these paths in the mod's ReShade.ini file with the paths in the ReShade.ini file from the games root folder:
TextureSearchPaths=D:\Games\GTA V\reshade-shaders\Textures
EffectSearchPaths=D:\Games\GTA V\reshade-shaders\Shaders
ScreenshotPath=D:\Games\GTA V
PresetFiles=D:\Games\GTA V\Real RAGE Graphics Enhancer.ini (correct only the path before \Real RAGE Graphics Enhancer.ini)
10. Save and close the ReShade.ini files
11. Copy the **Real RAGE Graphics Enhancer.ini** and the corrected **ReShade.ini** files from the „**ReShade**” folder to the game's root folder, where the **PlayGTAV.exe** file is.

CRASH MANAGEMENT

Make sure you are not running XFire, Afterburner, EVGA, other kind of tools and overlays.

NVidia GeForce Experience can produce issues with the ReShade, same with Steam Overlay enabled in-game.

Start the game in admin mode.

Trainers can conflict with ReShade!

If the game crashing with this mod I recommend to use **Simple Trainer for GTA V!**

With this trainer I can start the game without crash in 95% of starts.
